

Managing ARIS Projects with ARIS Business Architect

ARIS Business Architect is Web-based and supports professional, enterprise-wide Business Process Management (BPM). It offers maximum flexibility for modeling, analyzing, and optimizing business processes and benefits from an intuitive user interface. ARIS Business Architect contains extensive functionality for administering databases, users, scripts, etc. Alongside proven methods like event-driven process chains (EPCs), ARIS also supports BPMN, BPEL, UML, and other architecture concepts, such as, DoDAF, IT City Planning, and Zachman.

The conventions for the modeling framework you intend to apply are fully configurable using ARIS Business Architect, including individual layout templates and filters. The additional functional aspects of this client allow a modeler to progress to a super user and further exploit the ARIS modeling functionality and database content to the full.

The course provides the knowledge needed by ARIS Project Leads to manage projects. At the end of the course, you will be familiar with the key phases of an ARIS modeling project, and be able to implement and administer the ARIS project database with ARIS Business Architect. You will also know how to check ARIS database content and ensure its consistency.

Software versions covered

- ARIS Business Architect V7.1

Audience

- Business Analysts
- Project Managers (ARIS Project decision makers)
- ARIS Administrator
- Business Architects

Prerequisites

- Completion of the Business Process Modeling with ARIS Business Designer (ABD) training course or equivalent knowledge

Content

- ARIS Modeling Project Overview
- Role Concept for ARIS Modeling Project:
 - Roles
 - Tools
 - Responsibilities and Tasks
- Setting up the ARIS Project Database:
 - Group Structure
 - Access Rights Management
- Model Generation and Variant Copying

- Mass data import and export
- ARIS Evaluations
 - Search and Query
 - Semantic Checks
 - Reports (including introduction to ARIS Report Designer)
 - Macros
- Versioning with ARIS Business Architect
- Introduction to ARIS Business Publisher Export Program
- Introduction to ARIS Business Simulator
- Case Study

Methods

- Lecture, presentation
- Group discussion

Duration: 2 day
